

This is ridiculous, and enough is enough. The DMCA is going to radically change this country into a fictional reality that was the book 1984. We'll all be watched, one by one. No freedom. Anything we do will be punishable. This is not the reason why I love this country, and this is not the reason why so many people came to this country. It was for freedom; to say what you wanted, watch what you wanted, pay for what you wanted, and to live how you wanted! It's all written in the Constitution, is it not?
